a) function      b) control      c) arrow      d) Space bar      e) None of these
54. An error in a computer program is called  
a) virus      b) bug      c) crash      d) power failure      e) None of these
55. Example of non-numeric data is  
a) Employee address                      b) Examination score                      c) Bank balance  
d) All of these                      e) None of these
56. A computer cannot “boot” if it does not have the  
a) compiler                      b) loader                      c) operating system  
d) assembler                      e) None of these
57. C, Basic, COBOL, and Java are examples of \_\_\_\_\_ languages  
a) Low-level                      b) computer                      c) System programming  
d) High-level                      e) None of these
58. RAM can be thought of as the \_\_\_\_\_ for the computers processor  
a) factory                      b) operating room                      c) waiting room

- d) planning room                      e) None of these
59. A \_\_\_\_\_ is a micro processor based computing device  
 a) personal device                      b) mainframe                      c) workstation  
 d) server                                  e) None of these
60. The taskbar is located  
 a) one the start menu                      b) at the bottom of the screen  
 c) On the quick launch toolbar      d) at the top of the screen  
 e) none of these
61. The term bit is short for  
 a) megabyte                              b) Binary language                      c) Binary digit  
 d) Binary number                      e) None of these
62. Peripheral devices such as printer and monitor are considered to be  
 a) hardware                              b) software                              c) data  
 d) information                              e) None of these
63. = *sum* (B1 : B8) is an example of a  
 a) function                              b) formula                              c) cell address  
 d) value                                      e) none of these
64. Digital photos and scanned images are typically stored as \_\_\_\_\_ graphics with extension such as .bmp....jpg.....tit... or ....gif.....  
 a) vector                                  b) bitmap                                  c) either vector or bitmap  
 d) neither vector not bitmap                      e) None of these
65. To move down a page in a document  
 a) jump      b) fly                      c) wriggle      d) scroll                      e) None of these
66. A computer's type processor and operating system doing its  
 a) brand      b) Size                      c) platform                      d) speed                      e) none of these
67. The navigate to a new web page for which you know the URL, type that URL in the browser's  
 a) Address bar                              b) Domain bar                              c) Address button  
 d) Name button                              e) None of these

68. The process of a computer receiving information from a server on the information is known as  
a) pulling    b) pushing    c) downloading    d) transferring    e) None of these
69. Ctrl, Shift, and alt are called  
a) adjustment    b) Function    c) Modifier  
d) alphanumeric    e) none of these
70. Unsolicited commercial email is commonly known as  
a) spam    b) junk    c) hoaxes    d) hypertext    e) None of these
71. A device that connects to a network without the use of cables is said to be  
a) distributed    b) controlled    c) open source  
d) wireless    e) None of these
72. File is which shrinks the size of a so it requires less storage space  
a) Scanning    b) synthesizing    c) defragmenting  
d) Compression    e) None of these
73. The term which refers to data storage systems that make it possible for a computer or electronic device to store and retrieve data  
a) retrieval technology    b) input technology    c) storage technology  
d) output technology    e) None of these
74. The term which refers to any computer component that is required to perform work  
a) bootstrap    b) kernel    c) resource  
d) Source code    e) None of these
75. Which becomes different shapes depending on the task you are performing?  
a) active tab    b) insertion point    c) mouse pointer  
d) Ribbon    e) None of these
76. The ability of an OS to run more than one application at a time is called  
a) multi tasking    b) object – oriented programming  
c) multi – user computer    d) time – sharing

- e) None of these
77. A directory within a directory is called  
a) mini directory                      b) mirror directory                      c) part directory  
d) sub directory                      e) None of these
78. The collection of inter-related records is called  
a) utility file                      b) management information system                      c) database  
d) spreadsheet                      e) None of these
79. The term refers to any computer component that is required to perform work  
a) boots trap                      b) kernal                      c) resource                      d) source code                      e) None of these
80. One advantage of dial – up internet access called  
a) it utilize broad band technology                      b) it utilize existing telephone service  
c) it uses a router for security                      d) modem speeds are very fast  
e) None of these
